4. [REDACTED] and [REDACTED] reported on their meeting with [REDACTED] of the Staff of the Joint Committee on Printing. They said that approval was given for the purchase of our linotype machine for the Technical Services Staff but that Mr. [REDACTED] had indicated, apparently quite strongly, that the Committee was not happy about our failure to include our Printing and Reproduction Plant in the plans for the new building and that he intended to get in touch with me on this sometime soon. H

5. Addressed the military personnel participating in Project USEFUL on the "Support Functions of CIA." It seemed to go very well.

6. I asked [REDACTED] to start immediately sending me information copies of all completed O&M studies in order that I might have a better feel of just what his Staff was doing. Also arranged to meet with him for about forty-five minutes on the first and third Tuesdays of each month, beginning the week of 1 December, for a briefing on O&M activities. He said he thought that we should undertake a big study on the number of people who were performing personnel functions at headquarters. I agreed, but told him of the project which [REDACTED] has been working on in the FE Division and asked him to do nothing on this until I had seen Dan's report.

8. Jack also informed me that the Director had reviewed the papers on the [REDACTED] case and would write a letter to Senator Holland (of which I would get a copy) telling him that it had been fully investigated and that he would prefer to talk to him about it when he came to town. (He said he felt that the Director would want me to talk to the Senator also.) He added that the Director stated that he did not wish to press charges for Mrs. [REDACTED] dismissal at this time but that if she kicked over the traces once more he certainly would back us all the way.
